CarboxyGel Power Face Mask

CarboxyGel is a new anti-aging skin correcting technology gel. This breakthrough therapy generates activating bubbles that contain a proprietary formula which stimulates skin to restore beauty, energy and health. CarboxyGel Power Face Masks deliver these amazing results and more in a 30 minute non-invasive treatment that works on all skins, is pain free, and requires no equipment.

Activating bubbles are absorbed into the skin without injection to increase oxygen and the skin's ability to assimilate necessary nutrients and eliminate destructive toxins. The benefits of carbon dioxide to skin have been well documented over many years in numerous studies as well as personal testimonials describing its remarkable anti-aging and corrective properties including for acne and temperamental skin.

Now, these breakthrough benefits are packaged in the CarboxyGel Power Face Mask kit so you can offer your clients a new level of skin care perfection. Each kit contains 5 treatments which include 5 disposable dispensers containing 25 ml of gel, enough gel for a full face treatment. There is also an activating facial mask to cover the gel. As soon as the mask presses into the gel, skin revitalizing bubbles are generated. Clients will feel a tingling/prickly sensation from bubbling on the skin and the increase of skin surface activity that quickly calms as the power ingredients begin their work.

CarboxyGel treatments are safe and easy to administer. THERE ARE NO KNOWN RISKS ASSOCIATED WITH CARBOXY THERAPY. CarboxyGel treatments have no down time and results are cumulative and apparent from the first treatment! Most facial series are 5 – 10 treatments. For faster results, treatments can be done twice a week.

CarboxyGel Power Face Mask works to:

- Restores skin health
- Detoxify skin surface
- Maintain oil/ moisture balance
- Enhance skin elasticity and suppleness
- Provide smooth youthful facial contours
- Reduce pigmentation, freckles, age spots
